2-[(4-Chlorobenzylidene)amino]-4,5,6,7-tetrahydro-1-benzothiophene-3-carbonitrile

## A. M. Asiri, S. A. Khan and M. N. Tahir

Abstract: In the title compound, $\mathrm{C}_{16} \mathrm{H}_{13} \mathrm{ClN}_{2} \mathrm{~S}$, the dihedral angle between the 4-chlorobenzaldehyde moiety and the heterocyclic five-membered ring is $7.21(17)^{\circ}$. In the crystal, molecules are linked by weak $\mathrm{C}-\mathrm{H}, \ldots \pi$ interactions, generating [100] chains.
