

Guide to Instructions on How to Start Using Electronic Courses

We welcome our dear students to the electronic courses offered through distance learning and wish you an enjoyable learning experience.

- 1 The best way to browse your electronic course and benefit from its resources and learning opportunities begins with the “Start Here” page, where you will find many essential materials, course policies, guides, and video clips to help you complete your tasks in the e-learning environment.
- 2 Following the course plan set by your instructor ensures active participation and timely completion of activities.
- 3 Course activities include assignments, tests, and projects supervised by the instructor. Be sure to keep track of updates and announcements through available communication tools.
- 4 You can benefit from learning resources by downloading them to your device for review in your free time.
- 5 You can review recordings of virtual classes through the designated page if you wish to prepare for assessments or if you were unable to attend live sessions.
- 6 When submitting assignments, make sure your uploaded file matches the required formats supported by the system.
- 7 When completing an assignment or test, remember to click the “Submit” button to send your work to the instructor.
- 8 The course provides opportunities for self-assessment, allowing you to regularly test your knowledge.
